About me

I have significant experience in building new manufacturing plants (start ups) from scratch and managing a full cycle. I have been developing my soft skills for 18 year as production manager and quality controller.

I have studied all the roles and positions at manufacturing enterprises. I am fullstack manufacturing engineering manager.

Developed analytical skills, good memory, stress resistance, responsibility.

Soft Skills:

- English level - upper intermediate (B2) / have been working in USA by work experience program for students;
- Strong communications skills;
- Ability to manage, lead, and develop people;
- Capable of Business Processes Engineering and Automation of production processes;
- Ability to successfully create and manage budgets;
- Ability to work in Excel, Google Docs, Zoom, Bitrix24;
- Ability to solve unforeseen problems, outstanding decision making ability, positive attitude, common sense, and the highest integrity;
- Proven ability to deliver high-quality results autonomously and to prioritize multiple responsibilities;
- Strong critical thinking skills and organizational skills with excellent communication skills, both oral and written;
- Understand basic software testing theories, Agile methodology;
- Have theoretical knowledge of the basics of testing (types, methods), have basic knowledge of methodologies and software development process, understand the testing process, the role of the tester in the software development process;
- Deep interest in software quality and testing methodologies.

Hard Skills and Abilities:

- Software Testing - Base Course (Svyatoslav Kulikov) - 3rd edition;
- Dot Com Testing, or A Guide to Bugs Abuse in Internet Startups;
- Worked with Jira, Postman, Fiddler, Swagger, TestRail, Android Studio (SDK);
- Can write simple queries in SQL;
- Can write and make bug reports, make checklists, test cases, test plans;
- Worked with requirements;
- Can make black white box testing, regression testing; smoke testing;
- Can use Planning Pocker.

In progress(studying courses):

- Automated testing;
- JMeter Performance Testing.
